Kerry, see if you can get the file with the .piz extension. This has worked for me in the past. .rex is actually recognized as possibly containing scripts, so the EPA blocks it.

Attached is a renamed zip file containing the MDS sheets from Red River Supply in Williston, ND. You will have to rename the from redriversupplymds.rex to redriversupplymds.zip. Then you can unzip the file and you will see a slew of PDFs.

If you have any questions or problems, just let us know. We provide all IT support for Red River.
